GitHub

Knowledgeable Web Developer bringomg superior front- and back-end design to promote organization-specific website presence. Thorough comprehension of complex HTML, CSS and JavaScript programming languages along with subsequent frameworks such and Rails and React to generate custom webpage design.

## Projects - Showcased on website

### Micro-Reddit

This project uses Ruby and Ruby on Rails along with preprocessors such as ERB I created a small version of reddit with an SQLite3 database. This project shows my understanding of sessions, database management, and elements of front-end responsive design.

### Private-Events

This project uses Ruby and Ruby on Rails with an SQLite3 database. This project shows my understanding of database management and frameworks along with concepts such as joining data tables and HTTP request routing.

### Crypto Tracking API

Built using the React framework and vanilla CSS this project showcases my ability to learn and work in many different frameworks along with understanding of concepts such as hooks, state management, and navigating a 3rd party API.
